

Docket No. AUS920000782US1

**ABSTRACT OF THE DISCLOSURE**

**METHOD AND APPARATUS FOR MANAGING AND PRESENTING CHANGES  
TO AN OBJECT IN A DATA PROCESSING SYSTEM**

A method, apparatus, and computer implemented instructions for presenting changes to data are provided. User input is received through a first program in a first instance of a browser. The user input is placed in a variable. The user input is retrieved from the variable through a second program. The user input is processed by the second program to form a result. The result is presented in a second instance of the browser.
